

LayFlat Ducting™

Ventilation Duct

LayFlat Ducting™ light-weight polyethylene ventilation tubing is flexible, tough, and resistant to splitting or tearing. Ideal for temporary use in projects like water restoration and building renovations, by transferring large volumes of forced air into confined spaces, it resists moisture and most chemicals, and collapses when airflow stops.

Specifications

Material Weight	4 mil.
Material Type	Low-Density Polyethylene
Temperature	Up to 150°F
Length	250 ft. Rolls
Diameter	14 or 20 in.
Color	Clear

Features

- Manufactured from durable, clear polyethylene material
- Engineered for maximum elasticity, flexibility, toughness, and resistance to splitting and tearing
- Mold and mildew resistant, and water resistant
- Not designed for permanent installation

Markets & Applications

- Construction, Paint/Drywall, and Restoration
- Disaster Relief and Emergency Response
- Rental, Tent, and Structure
- Temporary Heating and Cooling
- Air Conditioning and Spot Cooling
- Ambient Air Distribution
- Dehumidification
- Utility Blowers
