Single and Double Plenums

For Hardwall Structures

Single and Double Steel Plenums are engineered specifically for hardwall temporary and semi-permanent structures, delivering efficient conditioned air distribution while maintaining a secure, airtight connection between HVAC equipment and the structure. Available in both single and double opening configurations, they provide the flexibility to increase airflow capacity, separate supply and return air, or support multiple duct runs—helping improve climate control, energy efficiency, and occupant comfort in demanding environments.

MADE FOR HARDWALL STRUCTURES

Single and Double Plenums

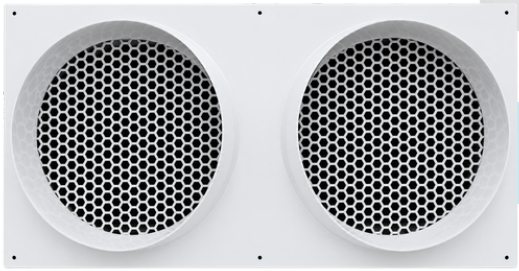

Panel Style	Single, Double
Material Type	Steel, Powder-Coated
Hole Diameter	12 or 20 in.
Panel Color	White

Features

- Designed to fit into most 24 inch tall door panels and/or hard walls.
- Steel construction and powder-coated for long-lasting durability.
- Offered in single or double plenum openings.

Longer Lasting Fixed Airflow

Efficient Climate Control

Triple Plenum

For Fabric Structures

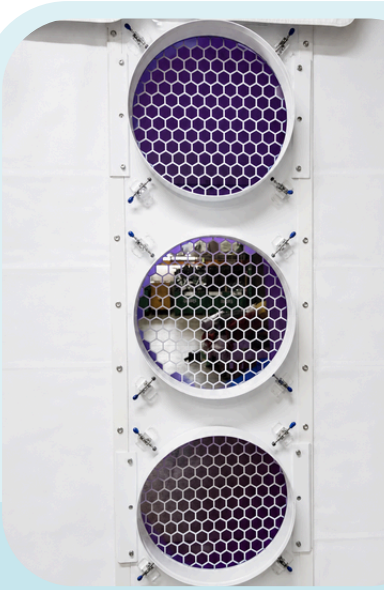

Built to perform and built to last, our Steel Triple Plenums ensure efficient supply and return air circulation while connecting effortlessly with flexible ducting and creating an air tight seal. Finished with a durable powder coating, they stand up to tough weather, sunlight, and everyday wear - resisting chips, fading, and scratches.

Their clean, finished appearance eliminates the need for unsightly plywood inserts or rough-cut wall openings, creating a more professional installation while improving the overall appearance and integrity of the structure.

MADE FOR FABRIC TENT STRUCTURES

Triple Vertical Plenums

Dimensions	26.49 in. W x 78 in. H (Adjustable)
Material Type	Steel, Powder-Coated
Hole Diameter	20 in.
Panel Color	White
Connections	Input Duct, Output Duct

Clean Sleek Look
Resistant to Tearing

Features

- Adjustable height - minimum 78 inch, with floor mounted support structure.
- Mounts to any style industrial tent, including rope/pole, frame, and clear span.
- Easy-to-install bracket secures to vinyl tent walls.
- Steel construction and powder-coated for long-lasting durability.
- Includes internal safety grates.
