

Ceiling Panel Kit and Duct Splitter

Ceiling Panel Kit

Our **Ceiling Panel Kit** includes one 8 foot CoolFlex™ Standard duct section with Belt Cuff ends and one Ceiling Panel. This kit is used to ensure a tight seal for your duct and is used for supply and return air circulation to the ceiling or side wall of your structure.

Panel Dimensions	24 in. x 24 in.
Material Type	Plastic, with Grooved Edges
Hole Diameter	12, 14, 16, or 20 in.
Panel Color	White
Included Duct	8 ft. CoolFlex™ Standard

Features:

- Durable, flexible construction for easy installation and removal.
- Reusable and easy to clean for repeated use.
- Includes an 8 ft. Coolflex Standard duct with Belt Cuff ends.

Duct Splitter

The **Duct Splitter** is made of flexible fabric and effortlessly connects three flexible duct sections together, with Hoop Cuff, to ensure a tight seal and efficient air ventilation flow. Customization upon request.

Fabric Type	Translucent Laminated PVC
Material Type	10 oz. (Custom Upon Request)
Diameter	12 - 20 in.

Features:

- Effective distribution of air down two different paths through the connection of three flexible ducts, creating an airtight seal.
- Compact storage and transport.
